The Mona Lisa was one of Leonardo da Vinci's favorite paintings, and he carried it around with him until he died. Today it is regarded as the most famous painting in the world, and is viewed by thousands of people annually. Who is this painted figure ? Many suggestions have been made, and most likely candidate is Lisa Gherardini, the wife of Florentine silk merchant.

Another more likely, but popular theory, is that the painting was a self- portrait. There are certainly similarities between the facial feature of Mona Lisa and artist's self portrait painted many years later. Could this be the reason for Vinci giving the portrait such an enigmatic smile ?

Today Mona Lisa looks rather somber, in dull shades of brown and yellow. This is due to layer of varnish covering the paint, which has yellowed over the years. It is possible that the painting was once bright and more colorful than it is now.

The Mona Lisa was stolen from Louvre in 1911, by a former employee who believed that the painting belonged to Italy. The thief walked out of the gallery with the picture underneath his painter's smock. He was apprehended by the police two years later and the painting was returned to the Louvre, where it is placed even today.

Questions :
