VI. Read the following passage carefully and answer the questions set on it :

5

Doctors are considered to be one of the most important persons of the society. Having a hospital, nursing home or a doctor's clinic nearby is one of the first things one sees while looking for a house. This is because having medical help nearby gives a sense of security.

Doctors specialised in various fields to provide treatments to the patients. Some of these include anaesthesiologist, cardiologist, allergist, gynaecologist, immunologist, neonatologist, oncologist, radiologist, obstetrician, physiologist and paediatrician. Most people visit general physicians when faced with any medical issue. These doctors examine the patients and prescribe them medicine and also refer them to specialist doctors if they need.

- 1) Who is considered to be one of the most important persons of the society ?
- 2) What did one see while looking for a house ?
- 3) Give the reason for doctors specialisation in various fields.
- 4) Name some of the specialisations.
- 5) Whom did most people visit ?

VII. Write a paragraph on **one** of the following in about **80-100** words using the hints given below :

5

VIII. Make note on the following passage by choosing either a linear or a diagrammatic format :

5

Cryptocurrency is a digital payment system that doesn't rely on banks to verify transactions. It's a peer-to-peer system that can enable anyone anywhere to send and receive payments. Instead of being physical money carried around

and exchanged in the real world, cryptocurrency payments exist purely as digital entries to an online database describing specific transactions. When you transfer cryptocurrency funds, the transactions are recorded in a public ledger. Cryptocurrency is stored in digital wallets.

Cryptocurrency received its name because it uses encryption to verify transactions. This means advanced coding is involved in storing and transmitting cryptocurrency data between wallets and to public ledgers. The aim of encryption is to provide security and safety.

The first cryptocurrency was Bitcoin, which was founded in 2009 and remains the best known today. Much of the interest in cryptocurrencies is to trade for profit, with speculators at times driving prices skyward. Cryptocurrencies run on a distributed public ledger called blockchain, a record of all transactions updated and held by currency holders.

Units of cryptocurrency are created through a process called mining, which involves using computer power to solve complicated mathematical problems that generate coins. Users can also buy the currencies from brokers, then store and spend them using cryptographic wallets.

IX. Do as directed.

a) Introduce Ramya, your college friend to your mother.

2

b) Write a set of instructions for the following in five or six sentences :

How to book an online bus ticket to Mantralaya ?
