VII. Prepare power point slides for the given below : **5**

Impact of Covid – 19.

- VIII. Read the following passage below and make notes using a format – diagrammatic or Linear :

4

With the increasing human population, the needs of the people also increase. But the point of concern is that are there enough natural resources to serve all your needs. What if these resources finish, this is one thing that we need to ponder upon. We need to start recycling waste to conserve our natural resources. Recycling is simply the process of reusing the items from which utility can still be derived. It is important to recycle waste so that we can at least conserve some of our natural resources for the generations to come.

Many products such as paper, cardboards and cups come from trees. In fact trees are our natural assets; you can conserve trees by recycling the paper products as by doing so we can minimize the number of trees cut down a year. This is one form of waste recycling. One should understand and know the importance of recycling waste materials. One simple benefit of recycling is that it saves our resources. It will be wise to reuse metal item as metal reserves may be depleting. You can sell your worn out metal items for recycling. As mentioned earlier, recycling of waste papers can save our forests.

Recycling waste will not only save our natural resources but will also help save energy. By simply recycling an item or making a basic fix to it, we can save all the energy that would have been consumed in the process of making it. The same example can be taken with plastic items. A large amount of energy can be saved by simply reusing the plastic items. To recycle waste is to simply reduce pollution. By recycling plastic material, we can reduce air pollution as well as water pollution. Plastic factories produce a large amount of smoke while producing plastic material at the same time, if we don't have a proper waste disposal system then those waste emissions will cause water pollution. Recycling helps reduce pollution too.

- IX. Bangalore University has directed all the affiliated colleges to conduct a Two – Day 'Personality Development' Programme. As a student coordinator of the event, prepare a report on the scheduled programme.

10

OR

You are Aravind, a reporter of The National Herald. Your State Government has banned the use of plastic bags. Using a suitable format, write a report on how the ban is being ignored and what damage the indiscriminate use of plastic bags is causing to the environment.
